13. (Currently Amended) An electronic device comprising an organic layer comprising at least one Ir(III) compound made from precursor compounds having the formula structure set forth in Claim 12.

14. (Currently Amended) An electronic device comprising a light emitting layer comprising at least one Ir(III) compound made from precursor compounds having the formula structure set forth in Claim 12.

15. (Currently Amended) An electronic device comprising a charge transport layer comprising at least one Ir(III) compound made from precursor compounds having the formula structure set forth in Claim 12.

16. (New) An electronic device comprising an organic layer comprising at least one Ir(III) compound made from precursor compounds having the following structure.

Claim 17. (New) The device of Claim 16, wherein the organic layer is a light-emitting layer.

Claim 18. (New) The device of Claim 16, wherein the organic layer is a charge transport layer.
